

Machine Learning (2019 Pattern) Question Bank (Unit I & II)

QN	Questions	Unit No.
1	What is Machine Learning. Also compare machine learning with traditional programming	1
2	Write down the applications of Machine Learning explain any three	1
3	Explain data formats and learnability with reference to Machine Learning.	1
4	What is Unsupervised learning? Explain advantages and disadvantages	1
5	What is Big Data? Explain with suitable example?	1
6	What is supervised Learning? Explain Advantages and Disadvantages	1
7	Write down the difference between Reinforcement Learning and Supervised Learning	1
8	What is the difference between Supervised Learning and Unsupervised Learning?	1
9	Explain data formats and learnability with reference to Machine Learning.	1
10	What is Feature engineering? Explain the four different processes in feature engineering	2
11	Explain in brief non negative matrix factorization with reference to PCA.	2
12	Write a short note on Sparse PCA and Kernel PCA	2
13	Explain the concept of scaling and normalization with its types	2
14	What is data preprocessing? Explain the steps involved in data preprocessing?	2
15	What is effect of unnormalized dataset in feature engineering?	2
16	Explain Kernel PCA and Local Binary Pattern helps in dimensionality reduction	2
