

B.E. (Computer) Semester - VII (As Per 2019 Pattern)

Design and Analysis of Algorithms

Anonymous QUESTION BANK (In Sem)

1. Explain the characteristics of an algorithm.
 2. Write an algorithm to check whether given number is even or odd.
 3. Explain the issues related to iterative algorithmic design.
 4. How to confirm correctness of algorithm? Explain with example.
 5. What are various problem solving strategies.
 6. Explain basic efficiency classes.
-
1. Explain time and space complexity with suitable examples.
 2. List three problems that have polynomial time algorithms. Justify your answer.
 3. Explain asymptotic notations with example.
 4. Prove that SAT problem is NP complete.
 5. Explain the concept of deterministic and non-deterministic algorithms.
